RE: CONFIRMATION OF ARRANGEMENTS – IGNACIO GARCÍA

I am pleased to support the PDP proposed by Dr. Ignacio Garcia.

A stay by Dr. García at our research centre in Tarragona, Spain, in April 2010 would be mutually beneficial on many counts:

- It would be a continuation of the cooperation developed on the basis of my previous visits to the University of Western Sydney.
- It would be on a topic directly related to the current activities of our research group, which has an on-going project on “Risk analysis of electronic translation technologies”. Three of our doctoral researchers are working on that project at the moment, and all will be present in Tarragona at the time of Dr. García’s visit.
- It would also give us the occasion to organize a seminar on the most recent web-based technologies, which is an area in which Dr. García is perhaps the leading academic in the world.

For all these reasons, I have no hesitation in lending my support and encouragement to the application.
