Introduction

All entries in this document have reference numbers; #AAx through #AEx are believed to be related to me, though #ADx is a group of possible relatives (not confirmed). Some groups consist of a large number of members of the Lunn, Croad, Smart and other families, whose relationship to my family has so far not yet been made; these are #BAx onwards. However, information about them is included because they may be part of the family. In many cases, extensive links exist between them. Within each letter group, the individuals are normally related in some way, or are taken from some common source, such as census data.

Because of the common practice of a woman adopting her husband's surname on marriage, the surnames given for many women may not be their maiden names. All people are listed and indexed by their birth names where known with other name changes noted except where a woman has adopted her husband's surname.

Within each generation of a group, names are listed in approximate order of birth, where known. If no birth year is known, but the marriage date or that of the birth of a child is stated, I have estimated the birth to have been about 25 years before; this is obviously only very approximate and may be quite erroneous in some cases.

The PDF version of the index links into the main tables; click on the reference number. Other blue text acts similarly. (*Note:* Not all links, especially from one name in the main tables to another, may not work; these are typically links with the same first two letters in the reference number.)

In some cases information in source material is clearly wrong, or likely to be so; I have corrected obvious errors or noted the suspect information.

Before 1874 it was not compulsory to register births, marriages and deaths, so official sources may be incomplete. (E&OE)

Diagrams of My Family Tree

Dates below names show the birth and death, where known. Dates above horizontal lines show the time and place of marriage, where known. Numbers in parentheses [thus: (2)] show the number of children, numbers in parentheses preceded by a plus sign [thus: (+2)] show the number of *additional* children, where known. Question marks indicate information that is unknown or a rough estimate. Three dots show that the person is believed to be still alive.

? Daughter: Kezia DELLOW (#AAH-3)

AAG-4. John GARDNER, b. c. 1781; agricultural labourer living in North Petherton, Somerset in 1841; 1841 census–Table 77
Wife: Ann (#AAG-5)
? Son: James GARDNER (#AAH-2); in view of the age difference between him and his parents, it is possible that he was their grandson–the 1841 census does not indicate family relationships

AAG-5. Ann, b. c. 1781; living in North Petherton, Somerset in 1841; 1841 census–Table 77
Husband: John GARDNER (#AAG-4)

AAG-6. Thomas DELLOW, chr. 1 December 1782 at Braughing, Herts

Details from Census Records

The Census in England is taken every ten years and has been since 1801, the only exception being during World War II (1941). Most pre-1841 census were not kept and therefore only a few pre-1841 census returns exist.

The census was taken on the following dates:
10 March 1801; 27 May 1811; 28 May 1821; 30 May 1831; 7 June 1841; 30 March 1851; 7 April 1861; 2 April 1871; 3 April 1881; 5 April 1891; 31 March 1901; 2 April 1911; 19 June 1921; 26 April 1931 (destroyed in WWII); (1941: not compiled due to WWII)

The number introducing tables of census information is the Public Record Office reference.

In some cases, forenames entered on census forms are the names by which the person was commonly known; this may not be the first name (e.g. the 1901 census has Emily Alma GARDNER (#AAJ-3) recorded as 'Alma GARDNER', as she was normally known).

Welney straddles the border between Cambridgeshire and Norfolk, so no distinction may be made between these counties.

1841 Census for England (HO 107)

Caution on ages recorded in the 1841 Census: Everyone over 15 had their age rounded down to the nearest five years.

No birthplaces were recorded in this census; instead the question 'Born in County' was asked (last column here, marked 'Y' or 'N', etc.).

Welney, Cambs

Notes: No LUNNs found in Welney

Debt of Honour Register In Memory of
GEORGE FREDRICK SMART

Private M/300666 406th Mechanical Transport Coy., Army Service Corps attd. 73rd Siege Bty, Royal Garrison Artillery who died on Thursday 26 July 1917. Age 41.

Additional Information: Son of George and Sarah Smart, of Cambridge; husband of Mrs. Smart, of 28, Cambridge Rd., Walthamstow, London. Cemetery: LIJSSENTHOEK MILITARY CEMETERY, Poperinge, West-Vlaanderen, Belgium Grave or Reference Panel Number: XVI. I. 1A.

Location: Lijssenthoek Military Cemetery is located 12 kilometres west of Ieper town centre, on the Boescheepseweg, a road leading from the N308 connecting Ieper to Poperinge. From Ieper town centre the Poperingseweg (N308) is reached via Elverdingsestraat, then over two small roundabouts in the J. Capronstraat. The Poperingseweg is a continuation of the J. Capronstraat and begins after a prominent railway level crossing. On reaching Poperinge, the N308 joins the left hand turning onto the R33, Poperinge ring road. The R33 ring continues to the left hand junction with the N38 Frans-Vlaanderenweg. 800 metres along the N38 lies the left hand turning onto Lenestraat. The next immediate right hand turning leads onto Boescheepseweg. The cemetery itself is located 2 kilometres along Boescheepseweg on the right hand side of the road.

Historical Information: During the First World War, the village of Lijssenthoek was situated on the main communication line between the Allied military bases in the rear and the Ypres battlefields. Close to the Front, but out of the extreme range of most German field artillery, it became a natural place to establish casualty clearing stations. The cemetery was first used by the French 15th Hopital D'Evacuation and in June 1915, it began to be used by casualty clearing stations of the Commonwealth forces. From April to August 1918, the casualty clearing stations fell back before the German advance and field ambulances (including a French ambulance) took their places. The cemetery contains 9,901 Commonwealth burials of the First World War, a few of which were brought in from the battlefields after the Armistice, and 883 war graves of other nationalities, mostly French and German. It is the second largest Commonwealth cemetery in Belgium. The cemetery was designed by Sir Reginald Blomfield.

Debt of Honour Register In Memory of
HERBERT JAMES SMART
Private M2/184095 Mechanical Transport, Army Service Corps who died on Monday 25 March 1918.
Additional Information: Son of George and Sarah Ann Smart, of Glen House, Welney, Wisbech; husband of Nelly Smart, of High St., Manea, March, Cambs. Cemetery: ST. HILAIRE CEMETERY, FREVENT, Pas de Calais, France Grave or Reference Panel Number: V. G. 5. Location: The town of Frevent is 39 kilometres west of Arras, 12 kilometres south of St Pol and 16 kilometres south-east of Hesdin. St Hilaire Cemetery and Extension is on the eastern side of the town on the south side of the secondary road to Sericourt (D54). Historical Information: Frevent was, from its position, a place of some importance on the Lines of Communication. It came into the British area for all purposes in March 1916. The 43rd Casualty Clearing Station was posted there from April to June 1916; part of the Lucknow Casualty Clearing Station in June; the 6th Stationary Hospital from June 1916 to the end of August 1918; and the 3rd Canadian, 19th and 43rd Casualty Clearing Stations in the summer of 1918. The great majority of the burials in the Cemetery were carried out from these hospitals. During the 1939-45 War the greater part of Frevent was destroyed by bombing. An aerial torpedo fell in the cemetery, which is near the railway line, damaging some of the graves; but the British plot was not affected. There are now over 200, 1914-18 and over 10, 1939-45 war casualties commemorated in this cemetery.

Conventions Used in the Index

Surname entries like [=LUNN] indicate that the person was married to a LUNN; a nonbracketed surname may be the original birth surname. Entries like '[male]' are used if the first name is unknown or if gender clarification is needed.

Within a group of entries for the same surname and first name, the names are given in chronological order of birth, where known or estimated.

Forenames that are similar (e.g. Ann, Anna, etc.) are listed together if the initial letter is common. All variants of CROAD (e.g. CRODE) are listed as if they were CROAD; similarly for others.
