Alien Lifeform: the True Story of the Great Black-Out

Last summer the whole world almost came to a standstill.
Nothing that relied on electricity or magnetism worked.
Millions of people were killed as a result of this catastrophe.
This much is so far general public knowledge.
Rumours have been rife as to its cause.

A group of Astrophysics researchers at the University of Exmoor
at Tiverton in Devon have investigated it and found the reason for the
Great Black-Out

UNIQUE EVENT

Before we start we want to assure you that this event
is *unique* in our lifetimes

These scientists believe that there is absolutely no possibility of it
occurring again for *at least* the next **10,000 years**

As well as the team of scientists, a Press Association journalist has been
working with them to ensure that the reports are available to the layman

The true **EXCLUSIVE** story is in a special supplement at the middle of this **NEWS** section. [Comment page 21]
